OVERALL BROCHURE CONSTANT TEMPERATURE EQUIPMENT 2024/2025

°FAHRENHEIT. °CELSIUS. °LAUDA.

LAUDA CALIBRATION THERMOSTATS

Specific application examples

- Calibration of thermometers
- Validation of temperature sensors
- Quality testing heat meter

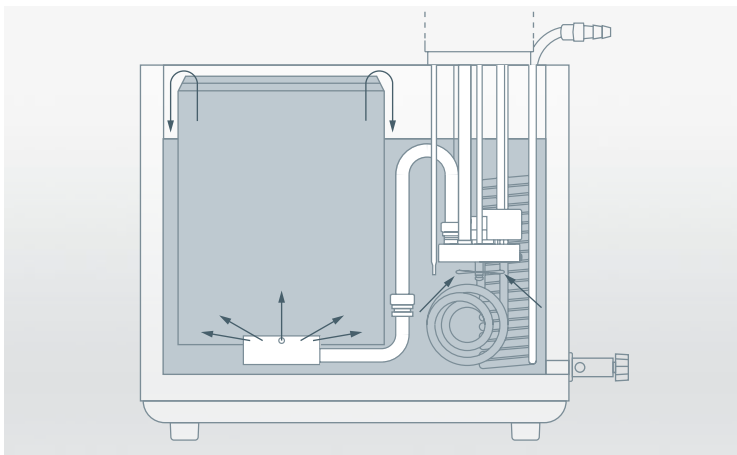

LAUDA ECO

Calibration and adjustment of temperatures from -25 to 200 °C with LAUDA calibration thermostats

High-performance comprehensive solution for calibration and adjustment

LAUDA calibration thermostats provide constant temperature and homogeneity in calibration and adjustment in the test chamber. Depending on the desired size, bath opening and usable depth, different types are available to choose from – each having variable testing chambers, as well as a comprehensive range of products and accessories. The ability of the thermostat to transfer heat through its heat transfer liquid 40 to 60 times better than through air makes it the perfect solution, especially in comparison to heating cabinets and metal block thermostats.

Constant immersion depth thanks to a calibration chamber with overflow principle

Simple operation via TFT display

COOLING PERFORMANCE Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

REJ1225 G

Important functions

- LAUDA Vario pump with six selectable output levels
- Vertical adjustment of the temperature chamber possible
- Stainless steel bath vessel (insulated, with handles and drain tap)
- USB interface as standard
- Programmer

Included accessories

Nipples, screw caps, bath cover

Further accessories

Calibration racks

All technical data and power supply variants can be found in the ›Technical data‹ section.

More at www.lauda.de/de/1772

LAUDA ECO

Temperature stabilities up to $\pm 0.02\text{K}$ at temperatures up to $-25\text{ }^\circ\text{C}$ are achieved with the LAUDA ECO calibration thermostats.

LAUDA Proline

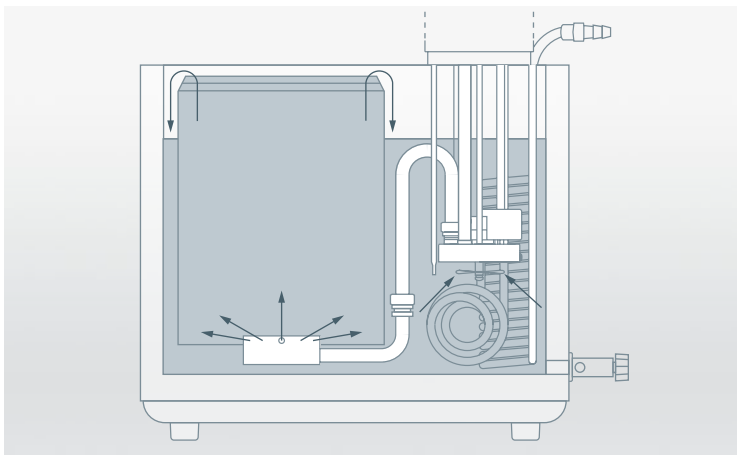

Calibration and adjustment of temperatures from -40°C to 300°C with LAUDA calibration thermostats

High-performance comprehensive solution for calibration and adjustment

LAUDA calibration thermostats provide constant temperature and homogeneity in calibration and adjustment in the test chamber. Depending on the desired size, bath opening and usable depth, different types are available to choose from – each having variable testing chambers, as well as a comprehensive range of products and accessories.

* On request

Constant immersion depth thanks to a calibration chamber with overflow principle

Removable remote control ›Command‹ for easy and intuitive operation

HEATING PERFORMANCE Heat transfer liquid: Ultra 240, bath closed

Bath temperature $^{\circ}\text{C}$

PJ 12/PJ 12 C
(up to 300°C)
PJL 12/PJL 12 C
(up to 200°C)

Important functions

- Stainless steel bath vessel (insulated, with handles and drain tap)
- Selectable Master control head with LED display or detachable Command operating unit with graphic LCD display
- LAUDA Vario Flex pump (pressure pump) with eight selectable output levels
- PowerAdapt system for optimally adapted max. heating output without influencing the mains power supply

Included accessories

Nipples, screw caps, bath cover

Further accessories

Calibration racks

All technical data and power supply variants can be found in the ›Technical data‹ section.

LAUDA Proline

For maximum temperatures up to 300 °C, the compact models of the LAUDA Proline PJ12 and PJ12 C can be used.
